→ What did we do? ←

# Programming

## IntelliJ

We used IntelliJ to code our program, with the language "JavaFX".

## Scenebuilder

Scenebuilder is used for the interface like the buttons, the decoration and the methods.

# Database

## HeidiSQL

We used HeidiSQL as our Database program because of its accessibility,  
we connected it to the program to store users, recipes, etc...

# D.E

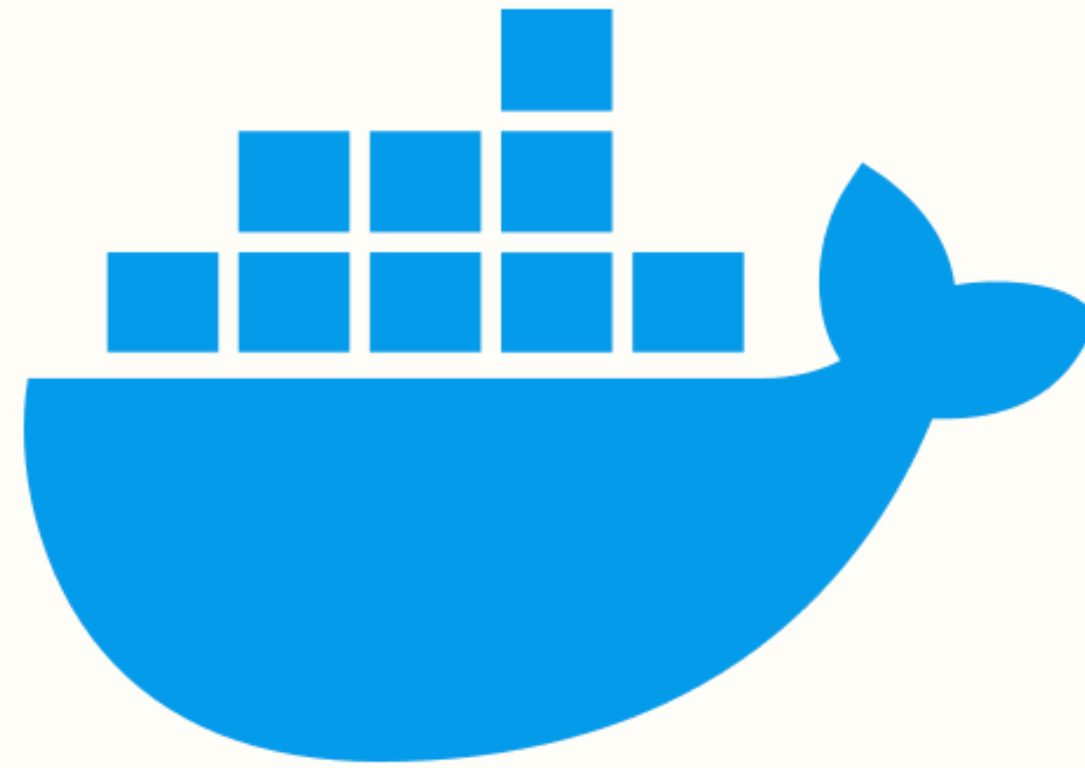

(Delevopment Envinroments)

## Drawio

Drawio is a web program to create maps, we used it to create the UML diagram and the Entity-Relation model.

C.S  
(Computer System)

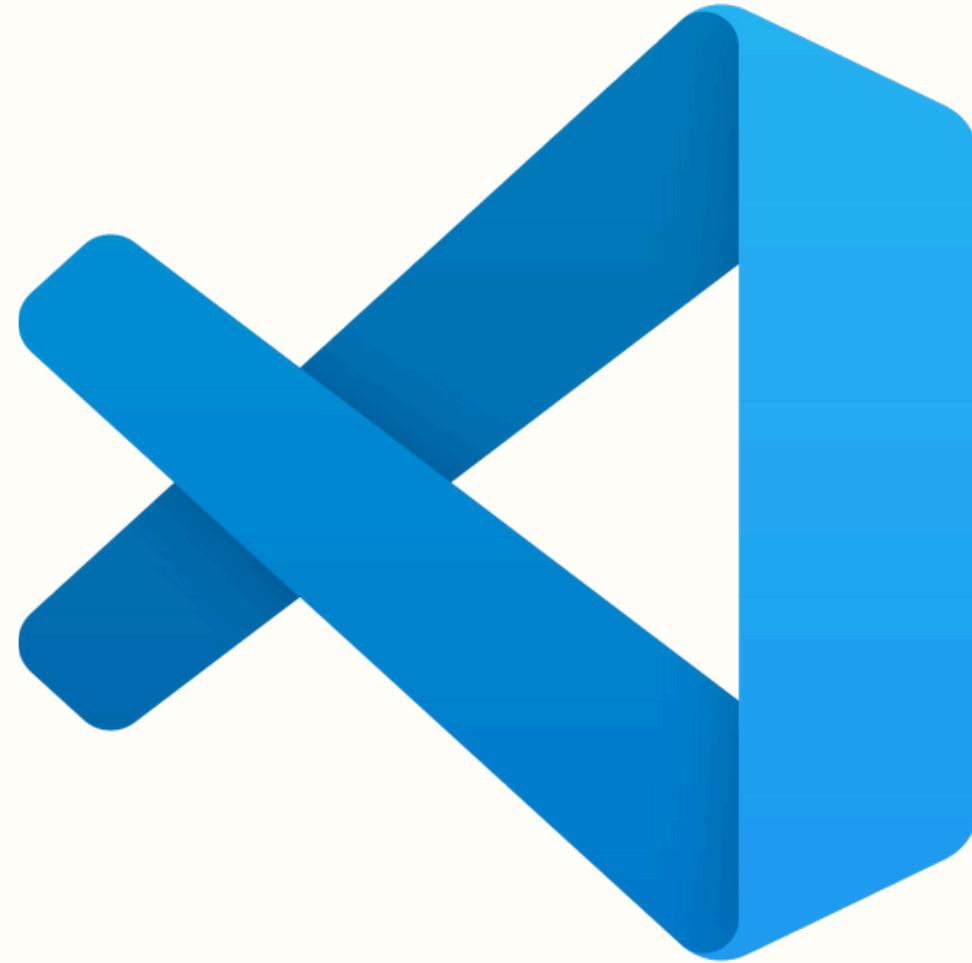

## Docker

We used docker to create containers to store works we did, such as the database, the html, the program...

# M.L.I.M.S

(Markup Languages and Information Management System)

## Visual Studio

Visual Studio was used to code our web page, with HTML and CSS.

# PEP

(Personal Employability Plan)

## Word

Hector used word on a daily basis to write down what we did every day.

## Canva

Hector made an organizational chart showing the team members and what we did.

Thank you
